About Company

Sharjah Steel Pipe Manufacturing Company (SSPMC)

Established in 1982, Sharjah Steel Pipe Manufacturing Company (SSPMC) has emerged as a leader in the steel pipe manufacturing industry. With a steadfast commitment to excellence, SSPMC utilizes cutting-edge machinery and equipment to meet international standards in product manufacturing. SSPMC strives to become the premier supplier of Spirally Welded Pipes to the greater quality in the middle east region. We aspire to produce a flawless product that exceeds the highest international standards. We are dedicated to our valued customers satisfaction by providing exceptional customer service, quality materials and after sales customer assistance.

2

Our Expertise

With decades of experience, SSPMC has become a prominent player in several key sectors, including construction, petroleum, and the water industry. Our dedication to quality and innovation has solidified our position as a trusted name in the region.

3

About Products

At Sharjah Steel Pipe Manufacturing Co. LLC,

we specialize in the production of carbon steel pipes for different industries. Our pipes are made with high-grade materials that ensure the best product for our clients. We strive for excellence in all aspects of our production process, from the selection of materials to the quality control of our products. Furthermore, our team of experienced professionals ensures a smooth and efficient production process with each of our orders. We take pride in our commitment to providing clients with the best quality products. SSPMC boasts an annual production capacity of 40,000 metric tons of spiral welded pipes. These pipes come in a wide range of sizes, customizable to lengths ranging from 6 to 18 meters. Our product portfolio includes two distinct types of pipes:

Line Pipes (16" to 64")

Crucial for the oil and gas and water sector, these pipes are designed for the efficient transportation of fluids.

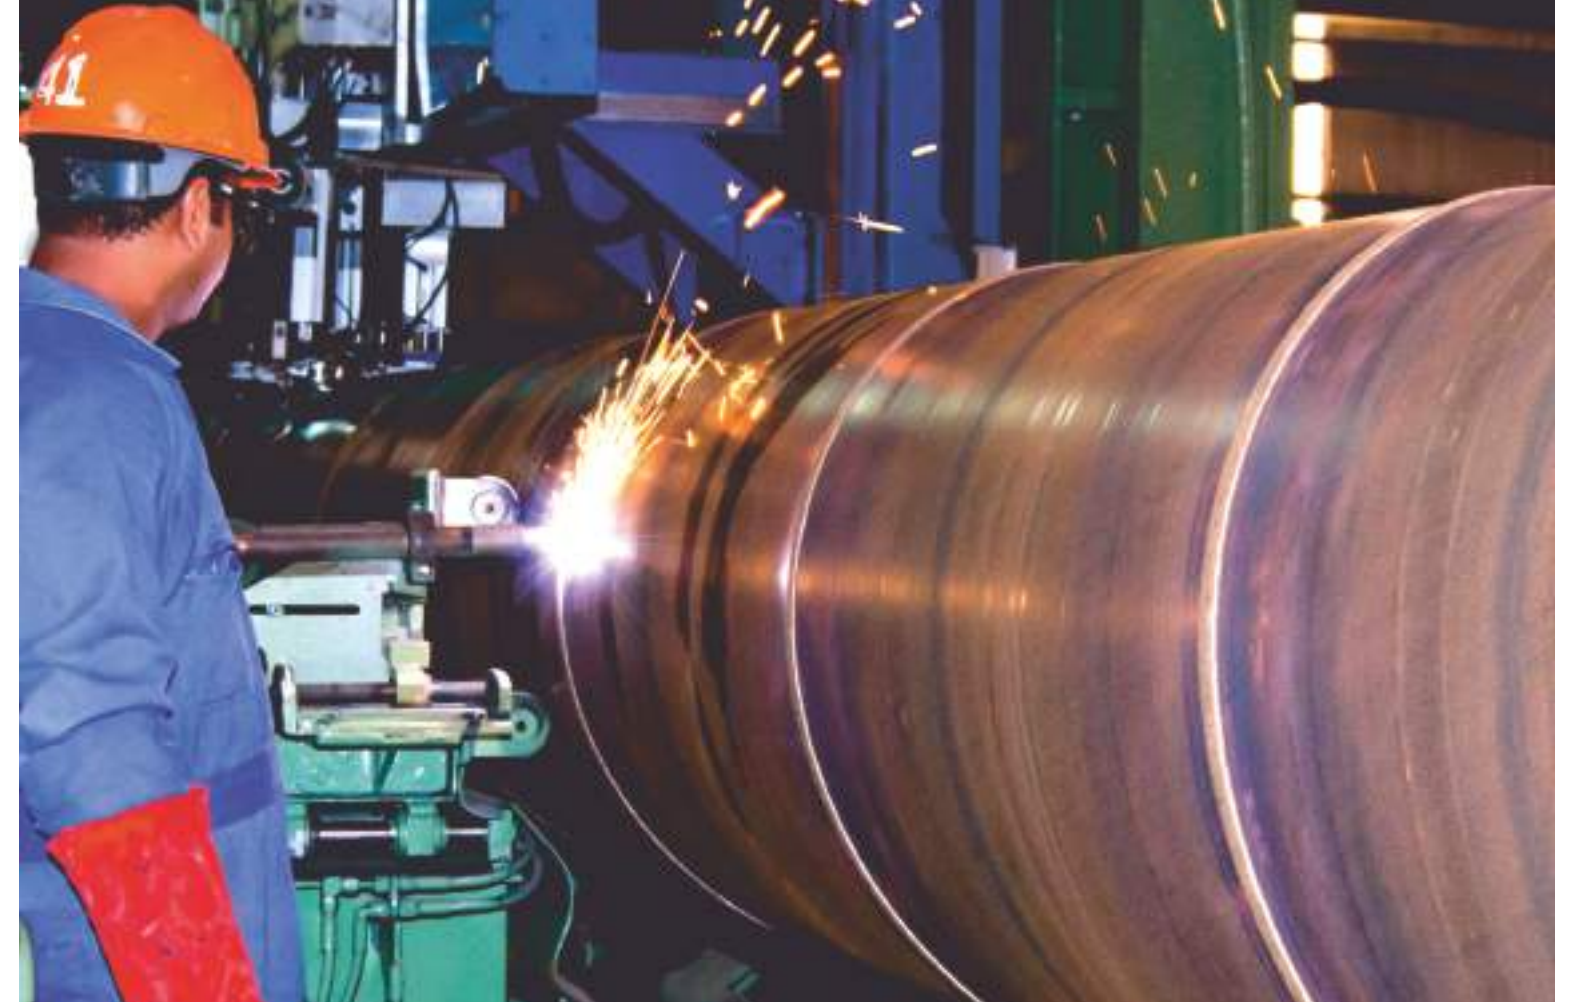

As per API Spec. 5L.

Pile Pipes (16" to 80")

Essential for construction projects, these pipes are engineered for stability and durability in foundation applications.

As per ASTM A-252

Wall Thickness Range : 6MM to 19MM

In addition to our core product lines, we offer specialized steel sleeve solutions tailored to unique project requirements. At Sharjah Steel Pipe Manufacturing Company, we are committed to providing top-quality products, superior customer service, and unwavering dedication to environmental responsibility. Join us in building a sustainable future with reliable and innovative steel pipe solutions.

Quality Control and Compliance

Our in-house Quality Control team, equipped with the latest technology and expertise, ensures that every product leaving our facility meets the highest industry standards. We adhere to stringent quality assurance processes, including Inspection, and Non-Destructive Testing (NDT).

Certifications

We proudly hold the following certifications, underscoring our commitment to excellence and safety:

API 5L
(American Petroleum Institute)

API Q1
(Quality Management System)

Quality Assurance

Our manufacturing processes are underpinned by stringent quality control measures, including:

- ◆ **Ultrasonic testing**
- ◆ **Fluoroscopic x-ray examination**
- ◆ **Hydrostatic testing**
- ◆ **Radiographic x-ray analysis**
- ◆ **Choice of square or beveled end facings**

7

Our Focus Areas

At SSPMC, we are dedicated to meet the needs of our clients in various industries, including:

Construction

Oil & Gas

Water Sector

District Cooling Project (DCP)

Key Features

Wide range of diameters from 16 inches to 80 inches
High-quality materials for durability and corrosion resistance
Customizable lengths and wall thicknesses for varying project needs
Available in different configurations, including open-ended and closed-ended
Manufactured to industry standards with rigorous testing and quality control

Benefits

Reliable and robust foundation solution for construction and civil engineering projects
Flexible sizing options to meet diverse project requirements
Durability and resistance to environmental factors for long-lasting performance
Customizable to accommodate varying pile installation depths and load-bearing capacities
Trusted quality and safety assurance for peace of mind in construction projects
